

Year 2 - Remote Learning January 2021

Dear Year 2 parents/carers and children,

I would like to thank all of you for logging on to our live lessons/greetings today and/or completing the assignments on Teams. You have all worked so hard to join in and also get to grips with this new way of completing and submitting your learning—we will be Teams experts in no time!

After reviewing the structure of today's learning, I would like to tweak the timetable so that it is more flexible, to support any parents who are working from home. It includes the same learning as in the original timetable but it includes less live calls which will allow you to complete the learning tasks at a time which is convenient for you as a family. Please note that all learning will be set as assignments.

9:00am	LIVE Sounds Write Taught Session Followed by English teaching input and task explanation.
10:00am	Maths learning will be scheduled for you to access from 10.00am. You may complete this at a time which is convenient during the day.
11:45am	LIVE Daily Story Telling
12:00 noon - 1:00pm	Lunch
1:00pm - 1:15pm	LIVE Foundation subject teaching input and task explanation.
At some point throughout the day	Lexia and TT Rockstars or numbots (40 minutes minimum Lexia per week).

Foundation subject timetable:

Monday	ICT and RE
Tuesday	Science
Wednesday	Geography
Thursday	Art and Music
Friday	PE and PSHCE

This week only:

Wednesday	Geography
Thursday	Science
Friday	Art

Tasks that we upload onto Teams will appear throughout the day linked to the timetable. I will do my best to provide feedback on learning submitted as regularly as possible, however I am still in school delivering learning to critical worker children and the response may not be instant.

You can contact me via email at d.howe189@middlestonemoor.durham.sch.uk or via the instant message feature on Teams and I will respond as soon as possible.

On the assignments section there may be a video to accompany the learning as well as the activity. You may need to be complete the activity on paper or alternatively on the document that has been uploaded. Please do not worry if you cannot complete the learning online, complete it on paper and upload a photograph of your completed learning. Uploading photographs is quite straightforward but is easier to do from a phone or ipad via the Teams app.

Foundation subjects on the afternoon will usually consist of a task to be completed either practically or on paper and a photograph uploaded as evidence.

I know there is a lot of new technology that we are all trying to become familiar with and I'm sure there will be teething problems however I know we can work it out together!

I am really looking forward to the live lessons and feel that this is a lovely way to still have some contact with the class.

Please do not hesitate to contact me should you have any questions.

Take care,

Mrs Howe
